# State of CCI

## Five Years of Impact

# Societal Impact: Virginia Cybersecurity Ecosystem

## Our Vision:

To establish Virginia as a global center of excellence in cybersecurity research and serve as a catalyst for the commonwealth's economic diversification and long-term leadership in this sector.

## Our Mission:

To serve as an engine for **research, workforce development, and innovation** in cybersecurity.

## AI For Cybersecurity and Cybersecurity for AI

CCI awarded 18 seed grants to nine Virginia public universities to address cybersecurity issues in artificial intelligence. CCI researchers are advancing AI to improve security and privacy; they are also instrumental in fixing new vulnerabilities brought about by the widespread adoption of AI in our systems.

## **Recruitment closes: April 30, 2025**

CACI interview written test:

May 12 to 16, 2025

CACI interviews: May 19 to 23, 2025

Selected students notified: May 27, 2025

Project duration: Sept. 5 to Dec. 5, 2025

Kick-off meeting: Sept. 5, 2025

Presentation: Dec. 5, 2025

# Workforce Development Impact

## CFP: 2025 Experiential Learning Program

- CCI seeks proposals for experiential learning projects that provide Virginia students with the essential skills and knowledge to launch successful careers in cybersecurity.
- The proposed program must benefit students at more than one CCI institution.
- Projects that provide students with workforce experience will be prioritized.

**Proposals Due:**

**April 25, 2025, 5 p.m. EDT**

Award Notification:

May 23, 2025

Project Dates:

June 2, 2025, to June 30, 2026

**Scan for More Info.**

# Workforce Development Impact

## Ongoing CFP: Cyber as a Service

- CCI seeks proposals for Cyber as a Service projects to enhance students' skills to enter the cybersecurity workforce on graduation and benefit the local economy.
- Projects, performed primarily by students, should provide a cyber service (e.g., penetration or pen testing, cyber risk analysis) to Virginia small businesses or not-for-profits in the same county as the institution of higher education.
- Up to \$15,000

Scan for More Info.

### ARTIFICIAL INTELLIGENCE

## To win AI race, invest in talent

The key to winning the artificial intelligence race will not be the data centers or power grids that we can build — it will be the talent that we can develop. In a field that is moving at breakneck speed, it is particularly important to form and recruit the professionals who will drive innovation in building and securing AI systems.

LUIZ  
DASILVA

The race for dominance in AI is running full tilt, with a strong focus on infrastructure resources. First came news of Stargate, a \$500 billion joint venture by Open AI, Oracle and Softbank, a development momentous enough to merit President Donald Trump's presence at its announcement.

trators use it to identify known attacks and combat "zero day" exploits on computer systems.

The flip side is that malicious players also develop attacks that target AI systems. For example, data poisoning attacks manipulate the data used to train an AI system so that it comes up with wrong outputs, or to create a backdoor that can be exploited for unauthorized access to information. AI can also be used to power ransomware attacks and social engineering attacks, through phishing that is increasingly sophisticated and targeted. And jailbreak attacks aim at bypassing security measures built around large language models, or LLMs.

In our network of Virginia universities, researchers are using generative AI to increase the security of iris biometrics, leveraging LLMs to analyze security vulnerabilities in

AI for cybersecurity is already firmly established. AI is routinely used to detect malicious activity: credit card companies use AI to flag unusual purchases, and system adminis-

FIVE  
YEARS  
OF CCI

# Research Impact: Open RAN

CCI plays a prominent role in ACCoRD, a \$42M project funded by NTIA under NOFO1 and led by AT&T and Verizon

- **Wireless Supply Chain Innovation Fund (\$1.5B):** CCI researchers had great success in NOFO1 (6 projects funded) and NOFO2. Currently working with partners on NOFO3 submission
- **CCI xG Testbed:** world-leading O-RAN facility, designated as an open testing and integration center by the ORAN Alliance
- **Global engagement:** State Department visits and international delegations; collaborations with ORAN initiatives in Asia, South America
