

A nighttime photograph of a city skyline, likely Arlington, Virginia, with a bridge over a river in the foreground. The city lights are reflected in the water, and the sky is a deep blue.

# Virginia Cybersecurity Challenge: 5G Background Information

# A new generation of wireless architecture arrives every decade

5G delivers up to 100 times the bandwidth of 4G, plus better reliability, less delay (latency), and connection to a higher density of devices

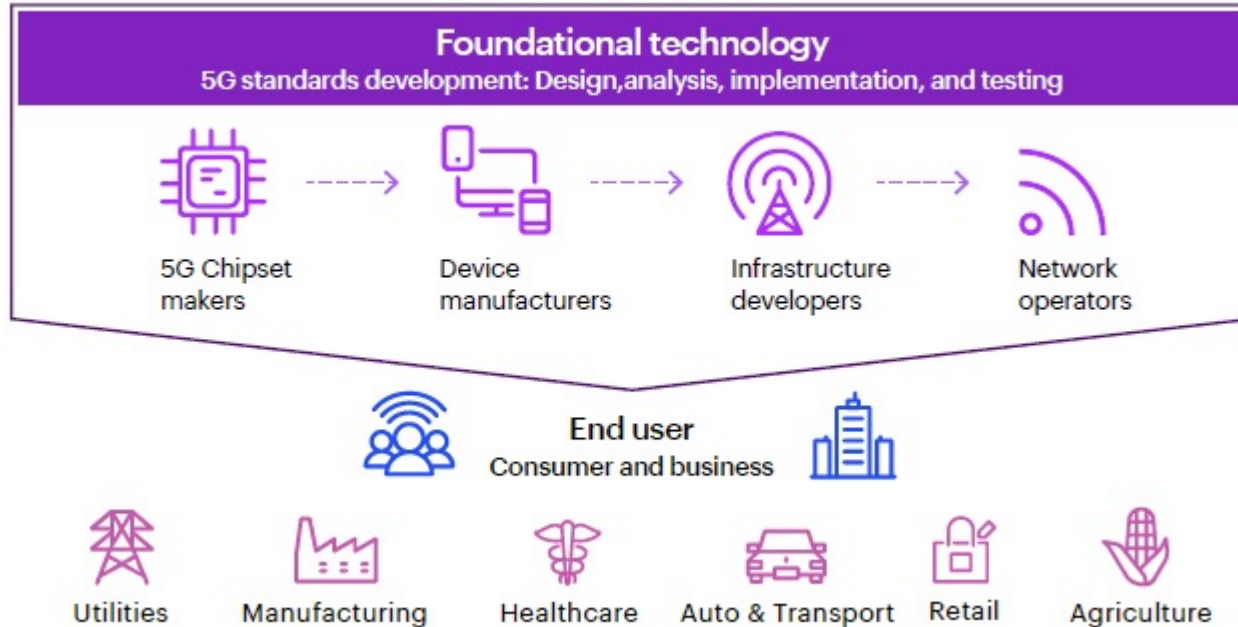

## Gearing up for a 5G Connected World

Technology	3G	4G	5G
	 Connecting humans	 Connecting humans+devices	 Connecting the world
Latency	300ms	~55ms	<10ms
High Bandwidth	1hr 3GB movie download	18min 3GB movie download	55sec 3GB movie download
Scale	Millions of devices	Billions of devices	Trillions of devices

# 5G requires extensive collaboration across multiple players

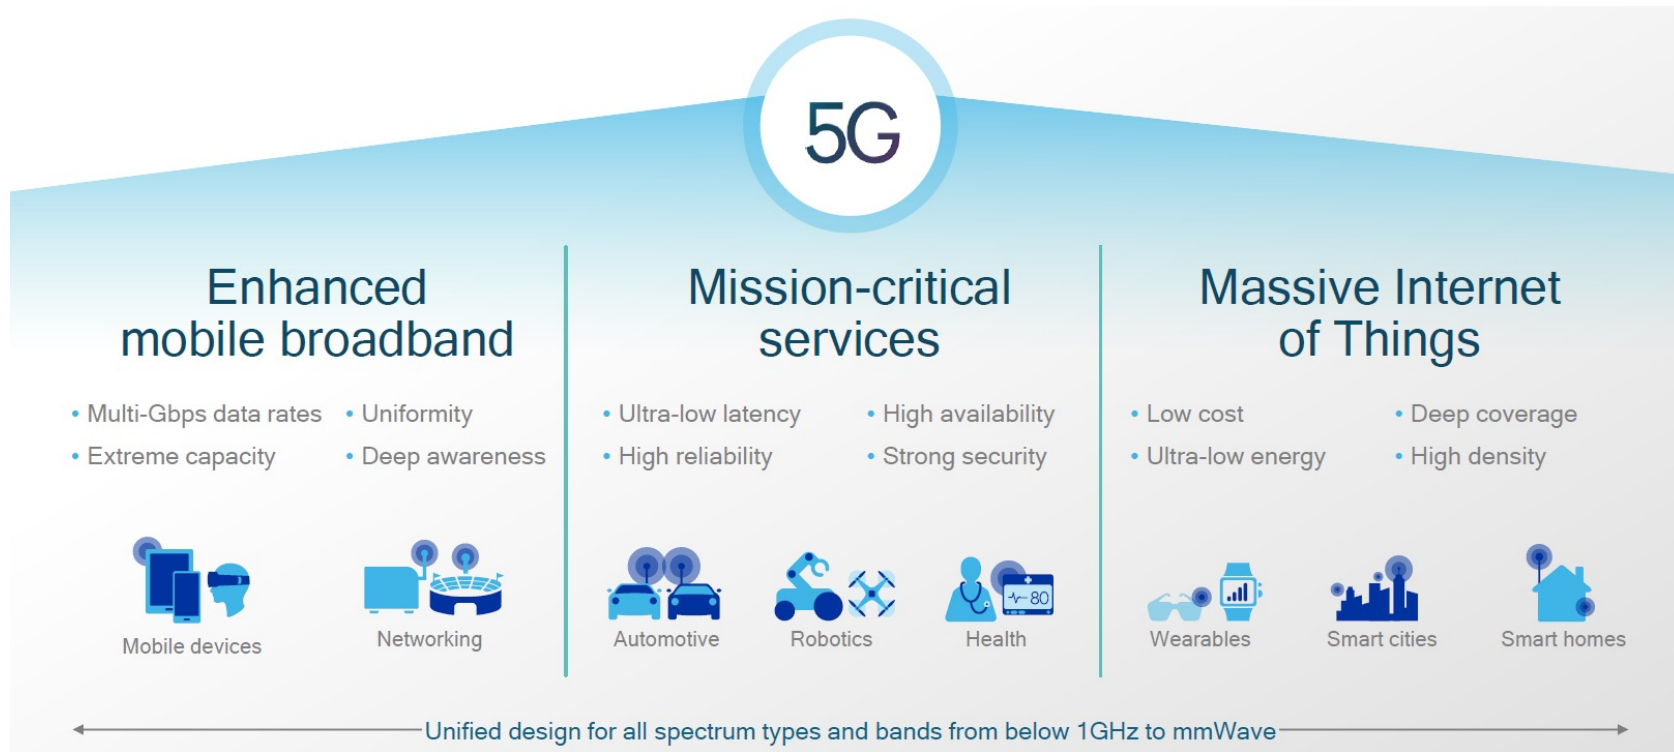

Not a single technology, but advances in spectrum availability, unified standards, and disaggregation of required equipment

Source: Accenture Analysis

# 5G promises a wide range of benefits

# Enhancing mobile broadband

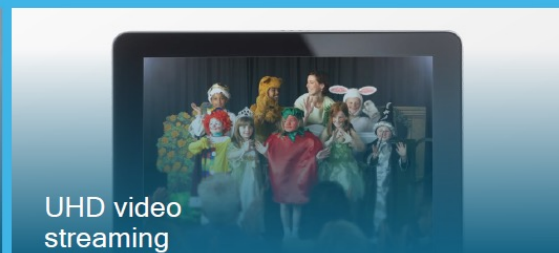

Ushering in the next era of immersive experiences and hyper-connectivity

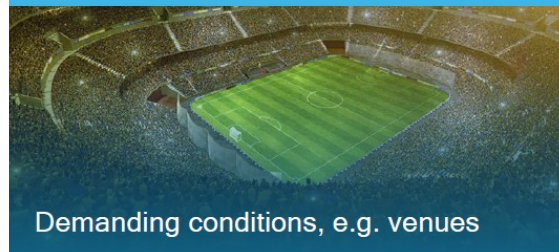

3D/UHD video telepresence

Tactile Internet

UHD video streaming

Demanding conditions, e.g. venues

Broadband 'fiber' to the home

Virtual reality

## Extreme throughput

multi-gigabits per second

## Ultra-low latency

down to 1ms e2e latency

## Uniform experience

with much more capacity

# Enabling new mission-critical control services

Delivering ultra-reliable, ultra-low latency communication links

High reliability

Extremely low loss rate

Ultra-low latency

Down to 1ms e2e latency

High availability

Multiple links for failure tolerance & mobility

# Connecting the massive Internet of Things

Optimizing to connect anything, anywhere with efficient, low cost communications

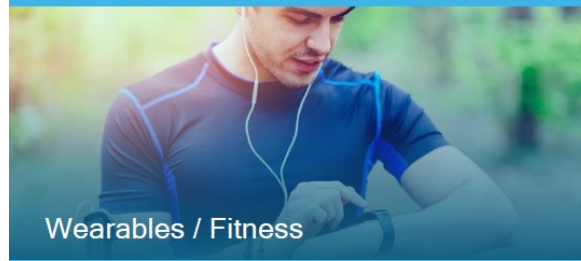

Smart cities

Smart homes

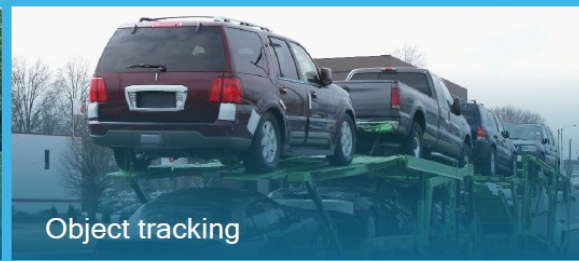

Utility metering

Wearables / Fitness

Remote sensors / Actuators

Object tracking

## Power efficient

Multi-year battery life

## Low complexity

Low device and network cost

## Long range

Deep coverage

# 5G is forecasted to drive \$2.6T in US sales and 16M jobs, '21-'25 ...

## Select Findings

### Manufacturing

5G-enabled factories can see up to **20-30%**<sup>63</sup> in overall productivity gains, including improvements of **50%** in assembly time, **20%** in asset life, and **90%** in defect detection.<sup>69</sup>

### Auto & Transport

New connected vehicle technologies have the potential to reduce the severity of non-impaired crashes by **80%**<sup>132</sup>, save **\$3.6 billion** in collision costs<sup>131</sup>, and reduce traffic by **25%**.<sup>141</sup>

### Retail

5G can enable rich video streaming experiences in the store, enabling up to **50%** increase in sales growth when combined with human-focused processes and XR visualizations.<sup>89</sup>

### Utilities

Transmission line monitoring using smart sensors and drones can reduce wildfire risk, potentially **saving billions of dollars**.<sup>109</sup>

### Healthcare

5G will allow more post-acute care to transition to remote, home-based models, where cost savings are greater than **30%** and drive better patient outcomes.<sup>109</sup>

Industry	Highlighted use cases	Potential benefits		
		New end services/product	Efficiency/productivity	Resiliency
<b>Manufacturing</b> 5G technology unlocks the ability to sense and respond for manufacturers in the United States, facilitating efficient communications between people and machinery.	Factory floor automation and robotic process control			
	Intelligent asset management			
	Connected worker			
	Quality assurance			
<b>Retail</b> 5G technology will create superior customer experiences and operating efficiencies in retail through innovative new offerings and the removal of key points of sales friction.	Digital store consultations			
	Frictionless store checkout			
	Intelligent clienteling			
	Automated surveillance			
<b>Healthcare</b> 5G technology will allow more mobile/home care, better patient outcomes and more capacity and flexibility within the healthcare system.	Remote patient monitoring			
	Virtual consultations and care			
	Connected hospital			
<b>Auto &amp; Transport</b> 5G technology will enable smarter, safer, greener and more efficient transport from connected vehicles and transit infrastructure in the United States.	Enhance vehicle safety and automation			
	Advanced fleet management and telematics services			
	New intelligent transportation systems			
<b>Utilities</b> 5G technology will enable reliability, safety and affordability throughout the utilities infrastructure and workforce in the United States.	Intelligent grid			
	Next generation workforce			
	Smart power plant			

<sup>1</sup> Economic analyses of digital services and cellular connectivity suggests that consumer surplus, the value consumers receive beyond prices paid for goods and services, is likely larger than sales and GDP impacts.
